EDUCATION

University of Washington, Information School

Seattle, WA

Bachelor of Science in Informatics | GPA: 3.9/4.0

Expected Grad Dec 2026

Relevant Coursework: Server-Side/Client-Side Development • Databases and Data Models • IOS Development

WORK EXPERIENCE

Joko Inc

Seattle, WA

Fullstack Developer / Project Lead

Dec 2025 - Present

- Led end-to-end development of a monetization platform enabling artists to build paid subscriber communities
- Implemented Solana smart contracts in Rust to enable secure on-chain subscriptions, reducing transaction costs by ~30% and finalization time by ~60%
- Built scalable services using React, Node.js, and Express, supporting service reliability, performance monitoring, and deployment readiness
- Owned architecture decisions across frontend, backend, and blockchain layers in a fast-moving environment

Dick's Drive-in

Edmonds, WA

Certified Trainer / Senior Employee

Sep 2022 - Present

- Operated in a high-throughput environment serving hundreds of customers per hour operating various positions maintaining 99%+ accuracy and cleanliness standards
- Trained and onboarded 30+ new employees, reducing average ramp-up time compared to store baseline
- Demonstrated ownership by mastering all operational roles within nine months (store average ~two years)
- *Twice awarded Commitment to Service Award; Averaging 4.7 out of 5 on reviews conducted every four months*

PROJECTS

Mood Diary

Seattle, WA

Backend Developer / Project Lead

Dec 2025

- Built a full-stack mood tracking web app allowing users to log, retrieve, and analyze daily emotional data
- Designed RESTful APIs for authentication, social features, and calendar integration using **Express** and **MongoDB**
- Defined database schemas supporting user relationships and historical data at scale
- Collaborated in a Agile team using iterative development to resolve backend challenges under time constraints

Resume Optimization System (ROS)

Seattle, WA

Web Developer

Mar 2025

- Built an accessible **React** web application with **Firebase** for hosting and data storage
- Integrated **Google's Gemini AI API**, creating practical prompts for enhanced user experience
- Worked through the entire design process in a group of four, using **Figma** for wire-framing purposes

XPyre

Seattle, WA

iOS Developer

Jun 2025

- Developed an iOS app in **Swift** to track perishable food items and reduce household food waste
- Implemented **Google's Gemini AI API** to recommend recipes based on soon-to-expire items
- Implemented local notifications to alert users of upcoming expirations

Canary

Seattle, WA

Web Developer

Jan 2025

- Developed an accessible web application using **HTML, CSS, JavaScript, and React** within a 12-hour hackathon
- Integrated **Google Maps API** to provide location-based functionality
- Collaborated in a team of four to rapidly scope, build, and deploy a working prototype
